TURBO PANTOUFLE

Turbo Pantoufle is an electronic solo project created by Lucien Mullener in November 2025 during his one-year residency in Paris. With his drum kit at the center, surrounded by synthesizers, effects pedals and percussions, he blends Melodic techno, Experimental, Broken Beat and Jungle to make you dance and dream. His debut album “1521” was entirely composed in his bedroom in Paris. “1521” Was the number of his room and sounds like a moving inner exploration, a desire to speak directly to your gut and get your feet moving. This album was his cabin in the woods, the space he built for himself. Today, he opens it up, inviting anyone to come in and dance.
