EXPOSUB

In view of the success of the 2021 edition, Festisub will adopt the same format for its 2022 edition. Taking the form of a free open-air exhibition, more than fifteen large-format photographs will be on display. The public will thus be able to marvel at the riches of the underwater world taken from the photos carefully selected by the festival's jury as part of the photo competition launched by Festisub at the beginning of the year.
