

NATURE, RIVE SUD DU LAC DE NEUCHÂTEL

THE GRANDE CARIÇAIE

With more than 3000 hectares, the Grande Cariçaie is an exceptional natural set that is famous on an international scale.

It hosts 8 nature reserves mostly accessible by foot or bicycle. The nature-centre of Champ-Pittet (Yverdon-les-Bains) and La Sauge (Cudrefin) are excellent places to discover the flora, the fauna and the preserved landscapes of the reserves.

You'll also make great discoveries by walking or riding on the 40km roads that crosses the reserves with information and observation points.
