

FUN & ADVENTURE, DELÉMONT

SUISSECOCKPIT

Take the controls of one of the world's most iconic airliners! The simulator, meticulously designed with authentic parts and based on X-Plane, offers an exceptional level of realism. Get ready for a unique and unforgettable experience.

Flight sessions are designed for one to two participants. Become a pilot for a day with the assistance of experienced instructors. No previous experience is necessary, just a desire to discover the thrill of flying.

Thanks to the passenger cabin, you can also share unique moments at your corporate events, with friends or to celebrate special occasions, with capacity for up to 8 people. Opt for an aperitif or apéro-dînatoire formula and let yourself be carried away by an immersive experience.

Imagine yourself comfortably seated, savoring a delicious Jura dish, while the sound of the engines transports you into an authentic atmosphere. Meanwhile, your friends challenge their driving skills. But don't laugh too hard: it's your turn to take the controls.

Not at ease with flying or fearful with phobic symptoms? Put an end to these unpleasant sensations and regain your freedom thanks to hypnosis. A specially designed environment and a programme tailored to your needs.
