GOGY ROOM

To mark the 10th anniversary of the Espace découverte Énergie in Mont-Soleil, a brand-new room has been opened within the EXPO ELECTRO in Saint-Imier: the GoGy Room – Go for enerGy. This educational space is specially designed to welcome school classes and groups, and it enhances an already fascinating venue dedicated to the wonders of electricity and its history.

In this room, discovery happens through hands-on experience: everything is meant to be touched and explored. Visitors are invited to understand what electricity truly is, how it transforms, moves, and powers our everyday lives. The educational journey includes several interactive stations:

- The "GoGy Puzzle", to explore electrons and how they move
- The "GoGy City" model, a smart miniature city that vividly illustrates the region's energy potential
- A deep dive into the Swiss Energypark, a unique open-air energy laboratory

All these experiences raise essential questions: What is electricity? How often do we interact with it each day? And is our consumption always aligned with production? With GoGy, the Espace découverte Énergie aims to spark curiosity, simplify the complex topic of energy, and above all, inspire future vocations.

PRICES

Prices	CHF 80.-
Up to 10 people (flat rate)	CHF 7.-
From 11 people (per person)	

GOOD TO KNOW

- Duration: between 1h and 1h30
- Maximum 20 people per group
- Combined visit with EXPO ELECTRO possible
- The room is closed from November to March
