

GUIDED CITY TOUR, GALMIZ

SEELAND COMPOSTING PLANT SA

Located in Galmiz, the Seeland Composting Plant is more than just a waste treatment site. This modern facility transforms organic waste into biogas, high-quality compost, and reusable raw materials. Its approach reflects a true circular economy: nothing is lost, everything is transformed. The combination of advanced technology and environmental awareness aims to preserve natural resources in the long term.

Free guided tours are offered (upon request) to groups, curious visitors or professionals interested in sustainability and waste management. The visit includes insights into the different processes used on-site and can be combined with an aperitif.
