# DANCEHALL

Dancehall is a music genre based on reggae that shares similarities with hip-hop. Originally, the term "dancehall" did not refer to a distinct style of reggae but simply the music played at Jamaican dancehalls (venues for large dance parties known as "dances"). In Jamaica, this music gave rise to its own expressive dance style that blends elements of Afro, street, reggae, and hip-hop. The fantastic music and corresponding dancehall choreographies are simply infectious and bring a lot of fun.
