ASTRONOMY EVENINGS CHASSERAL

On 8 May, 12 August and 12 September 2026, Hotel Restaurant Chasseral, in collaboration with Astro Events, hosts three astronomy evenings on the summit of the Chasseral. Thanks to its elevated location, 360° panorama, distance from major cities and low light pollution, the site offers ideal conditions for observing the night sky.

During an interactive introduction, you will learn about the fascinating celestial objects visible through the professional telescopes provided. Planets, constellations and the Milky Way can be observed in a peaceful setting far from traffic and noise.

The evening is complemented by a three-course dinner at Hotel Restaurant Chasseral. If you wish, you can stay overnight on site and fully enjoy the unique atmosphere of the summit.
