MICH GERBER DRIFTING CLOUDS KONTRABASS SOLO

Concert in the Stadtkirche Biel/Bienne

DRIFTING CLOUDS – Like clouds in the sky, Mich Gerber's music is constantly changing: it emerges, transforms, dissolves – and yet remains palpable. The work **DRIFTING CLOUDS** unfolds as a 60-minute stream of sound full of subtleties and transitions. It is an invitation to surrender to the transitory, to pay attention to what is passing by, and to immerse oneself in a contemplative listening experience. Music that begins before the first note – and lingers long after.

Mich Gerber, a pioneer of modern double bass music, combines classical roots with the breadth of world music. His unmistakable style, shaped by global influences and a love of technical experimentation, transforms the double bass into a narrative solo instrument – powerful, poetic, and always surprising.
