GUIDED CITY TOUR, LE LOCLE

POST-STORM FOREST

A severe storm impacted the Neuchâtel Mountains. Starting from Le Locle train station, set off on a 13 km hiking loop to the Escarpineau viewpoint. In the Monterban valley, an area still marked by the storm, the guided route allows visitors to observe forest regeneration and its remarkable resilience over time. A guided immersion between the memory of the damage and the observation of nature in full recovery, along a unique and preserved natural trail.
