VISIONS OF THE FUTURE

What if Friedrich Dürrenmatt had already imagined our future? Artificial intelligence, space exploration, wars and crises: the Visions of the Future exhibition reveals the striking relevance of his work through three speculative stories and his collages. His visions also enter into dialogue with works by contemporary female artists. Between dystopia and utopia, the exhibition explores the issues of our time and invites us to reflect on the world of tomorrow. A fascinating journey into a universe where fiction and reality echo each other in surprising ways.
