MUSEUMS, LES BIOUX

PIERRE GOLAY EXHIBITION

The main attractions of the exhibition are the time machines activated by steel balls and put into motion using windshield wiper motors and video recorders. Rolling marbles activate animated scenes reproducing the creation of the world, the history of Switzerland or to illustrate good from evil.
Other than the strange mechanics, visitors can admire a collection of pipes, a replica of the first file cutting machine designed by Léonard de Vinci as well as many other objects that will nourish your curiosity and give you an idea of the multiple talents of Pierre Golay, often referred to as « Archimedes ».

GOOD TO KNOW

For groups of more than 8 people: no online booking, only by email or phone
