THE SILVOPASTURE OF LES PRÉS D'ORVIN

Wooded pastures are a traditional form of mixed use as pasture and forest. Numerous species benefit from this mosaic of herbaceous and wooded environments. In the Prés d'Orvin, the walker strolls in such pastures, in a pure and preserved nature. While enjoying the beauty and the calm of nature, one can also admire the dry stone walls, witnesses of the history of the region. You can also enjoy the typical Grand Chasseral farmhouses, which serve fresh regional products.
