NATURAL SITES, RÉCLÈRE

CAVES OF RÉCLÈRE

Discovered in 1886, the Caves of Réclère immediately hit the first visitors with their splendor to the point that, aware of their incredible wealth, we began operations in 1890!
It's along a developed 1,500 meters you will discover stalagmites and stalactites of rare beauty and great diversity. Thus, you can admire the elegant Pagoda, the enigmatic portrait that hints in his face and a face in profile, the Dome, which with its 15 meters high is the largest stalagmite discovered in Switzerland.

The Réclère Caves are closed for the winter season and will reopen at Easter 2027 (March 28th 2027).
Special opening on November 14 and 15, 2026, for the Saint-Martin celebrations.
