# PETIT-VAL

This part of the region, both remote and close to everything, is a true haven of peace where nature is preserved. Its fields, its pastures, its forests, its orchards, all bear witness to a true harmony that the hand of man has managed and enhanced with great respect. Its particularities can also be observed in the built environment of its villages which have kept the rural character of their origins. The inhabitants of the Petit-Val have taken advantage of these assets to produce delicious local products that can be tasted directly by the producer. Many hiking, horseback riding and mountain biking trails allow you to discover these landscapes throughout the seasons.
