CRÊTE DU CHASSERAL

"The ridge trail of the Chasseral is something every person should experience at least once in a lifetime! The first time I did this hike was about 10 years ago, and since then I come back every year. I love walking in the forests and the wooded pastures, so typical of the region. I also admire the karst landscapes with its many sinkholes. On the way, I take a break in one of the farmhouses. I rest my legs, eat and drink before heading off full of energy. For me, the highlight of the walk is the breathtaking view at the top of the Chasseral over the Alpes and the Swiss Plateau."
