LES CHEMINS DU BIO (THE ORGANIC TRAILS)

"We've gone walking all over Switzerland, but we hadn't seen much of the Jura yet. So we let ourselves be tempted by a package deal offered by "les chemins du bio", with a whole philosophy behind it! We left home by train and got to our starting point late in the morning. The weather was just right for walking, so with our "trail guide" at the ready, we set off to discover areas that were unfamiliar and a bit mysterious for us. It was just marvellous! We loved the contact with farmers, the informative guided tours and the flavoursome meals with regional organic products. Attractive routes across meadows and through forests took us from farm to farm. After a good night's sleep and a hearty breakfast, we were raring to go again. It was a fantastic experience!"
