FUN & ADVENTURE, DELÉMONT

VICTORINOX SWISS ARMY SA

Founded in 1884 in Ibach in the Canton of Schwyz, Victorinox is renowned for its famous Swiss knife, which is known worldwide.

In 2005, the Victorinox group acquired Wenger in Delémont, a Swiss company that also specialises in knives. Victorinox's purchase of Wenger consolidated the brand's position as a leader in Swiss army knife manufacturing.
The Delémont factory is a production site for some of the brand's most famous knives, designed from carefully selected raw materials.

Suitable for families, couples, groups of friends or companies, a guided tour enables you to discover the secrets behind the manufacturing processes including pocket knives, butchers' knives and peelers.

Information regarding guided tours:

the guided tour begins with a presentation about Victorinox and the history of Wenger. Visitors are then guided through the workshops, which commence with raw material stock and end with packaging. The visit includes exploration of the manufacturing process for pocket knives, butchers' knives and peelers. Finally, those wishing to purchase souvenirs can visit the factory store, which offers a full range of Victorinox products as well as items licensed by Wenger.
