TOURIST TRANSPORT, BRESSAUCOURT

BRESSAUCOURT REGIONAL AERODROME

"Even faster than the TGV: from Paris, it takes less than two hours to Bressaucourt, the regional customs airport with advance notification of arrival. Here I can also fill the tank with kerosene – no problem either for my pilot friends who fly on AVGAS 100LL or unleaded, because that is available as well. The landing is interesting, sometimes sporty if there's a lot of wind. But the tarmac runway is long enough (800 meters) and the terrain open. The surroundings are idyllic: the tower resembles a UFO which has landed in a field, the terrace of the restaurant invites to linger, and the airfield staff attending full-time are very friendly. I can only recommend this place!"

Marcel

GOOD TO KNOW

- The restaurant Le Cockpit invites to take a break and watch the departing airplanes.
- Flights for travel and leisure purposes
- Commercial flights
- Skydiving (on request)
- Pilot training for motor planes
- Maintenance and servicing
- Restaurant
