CULTURAL HERITAGE, LA BRÉVINE

ILLUMINATED CHURCH

If you want to know the ambient temperature, just look for the bell tower of La Brévine's church: it is lit in colours that change with the temperature, visible from far and wide.

GOOD TO KNOW

- After dark, five projectors installed around the church illuminate the bell tower in different hues – of red in warm weather and of blue during cold spells
- The lights are switched off from midnight to 6 am.
- The village webcam ensures that the same information can be received worldwide
