NATURAL SITES, LA BRÉVINE

LAC DES TAILLÈRES

An enchanting lake – but it could send shivers down your spine when you realise it's located in Switzerland's coldest valley! Lined with pine trees and meadows, the lake often becomes a natural skating rink during winter, set amid fairytale scenery. A thoroughly Siberian experience in the heart of the Jura.

GOOD TO KNOW

- Approx 1.9 km long and 100 m wide, in Winter, when the lake is frozen, it's a skaters' paradise
- 3 km to the west from the village of La Brévine, accessible by car, on foot, by bike or on cross-country skis
- Lovely spot for picnics on the south-west bank of the lake, accessible by little paths along the lake
- You can walk round it on foot
