GUIDED CITY TOUR, MONT-SOLEIL

HEAD IN THE STARS

Thanks to our main telescope with a 432 mm mirror and other instruments, this evening tour of the observatory, which lasts about an hour and a half, will allow you to immerse yourself in the wonders of the starry sky. Depending on the time of the visit, your guide will show you the surface of the Moon and its multitude of craters, observe the visible planets (Venus, Mars, Jupiter or Saturn), or discover some deep sky objects, star clusters, nebulae or galaxies, inaccessible to the naked eye because they are located at incredible distances from our Earth.

In case of bad weather, a virtual tour of the sky with live commentary will be offered thanks to our latest generation digital planetarium.

A change of scenery guaranteed!
