NATURE, VALLORBE

VALLORBE CAVES

One of the best-known attractions in the Yverdon-les-Bains region, the Vallorbe natural caves are well worth a visit. The rich geological formation combined with skilful lighting creates a magical atmosphere for visitors to these caves. Although you'd probably imagine the underground tunnels to be wreathed in silence, this is not the case at all: the river roars noisily but eventually dies down until all you hear is the light trickling of water down the walls.
?
The Cathédrale, at over 30 m high, is the natural theatre for a sound and light show. The visit concludes with the Fairy Treasure Trove, an amazing collection of 250 minerals from all over the world.
?
Both summer and winter, the caves remain at a constant and comfortable temperature. Open all year round, the supernatural effects of this exceptional environment are a particular favourite with children and teenagers.
