

SWISS PARK

# CHASSERAL REGIONAL PARK

Stretching from La Chaux-de-Fonds to Sorvilier and from La Neuveville to Tramelan, the Chasseral Regional Park gravitates around the highest peak in the Bernese Jura: the Chasseral. Symbolized by its telecommunication antenna, visible far and wide and planted like a lighthouse on the fourth highest peak in the Jura, the Chasseral Park has many faces. Wooded pastures streaked with dry stone walls, vineyards, coombs, plateaus and valleys follow one another in a green environment. The Park works for a harmonious development by enhancing and preserving its natural, cultural and built heritage.

## GOOD TO KNOW

The annual activities programme of the Chasseral Park with its detachable map is a mine of information on ideas for things for both visitors and local people to do in the Park.
